# 16-20 June 2025, Naples (Italy)

# HPC for Science, Industry, and Society

Parallel, distributed, and network-based processing has undergone impressive impulse over recent years with new architectures, advanced programming models and tools, integration with big data analytics and novel application domains. The **CINI HPC Summer School** offers an intensive program on the entire hardware and software stack, in an essential co-design for HPC solutions and data-centric workloads.

## Call for attendees

We are looking for Ph.D. students, young researchers, professional engineers operating in the industry, and outstanding undergraduate students. Applicants will be evaluated on their CV.

**Application will be open on 1 Jan. 2025.**

## Important dates

- Application: 1 Jan. - 11 Apr. 2025
- Acceptance: 18 Apr. 2025
- Enrollment: 30 Apr. 30 2025
- School: 16-20 Jun. 2025

## School Program

### → Learning

Familiarize with the state-of-the-art HPC hardware and software.

### → Mentoring

Provide advanced mentoring, inspiration, and field experiences.

### → Networking

Promote the creation of networks of researchers in HPC.

### → Opening

Facilitate international exchange and open up further career options.

**5** Thematic areas

**23+** International speakers

**18+** Classes & lectures

**6+** Tutorials
